PROFESSIONAL SUMMARY

Senior Android & Full-Stack Engineer with 10+ years of experience building production-grade mobile applications, scalable backend systems, and full-stack platforms. Independently architected Android applications with more than **1M+ cumulative installs** and backend infrastructures serving users, dealers, partners, and administrators across India. Experienced in Kotlin, Java, Node.js, Bun, Hono.js, MongoDB, Next.js, Firebase, and scalable REST API systems with end-to-end ownership from development to deployment.

CORE SKILLS

Mobile	Android SDK, Kotlin, Java, MVVM, Coroutines, Retrofit, Room Database, LiveData, ViewModel, Paging, WorkManager, XML Views, Jetpack Components, Navigation Component
Backend	Node.js, Express.js, Bun, Hono.js, REST APIs, MongoDB, Mongoose, RBAC, API Key Authentication
Frontend	Next.js, React, Vite, JavaScript ES6, HTML5, CSS3
Infrastructure	DigitalOcean, Ubuntu, Nginx, PM2, Firebase Authentication, Firebase Analytics, Firebase Crashlytics, Firebase Cloud Messaging
Tools & Process	GitHub, Git, Clean Architecture, Production Deployment, API Integration

PROFESSIONAL EXPERIENCE

Founding Engineer

- Led architecture and full-stack engineering for RepairPhone, a nationwide repair service platform.
- Architected scalable backend systems using Bun, Hono.js, MongoDB, and Mongoose.
- Built REST APIs supporting customers, repair partners, administrators, and third-party platforms.
- Implemented Role-Based Access Control (RBAC) and built an API key authentication and external integration platform.
- Developed partner and admin Android applications using Kotlin and XML Views.
- Rebuilt frontend platform using Next.js.
- Managed production deployment on DigitalOcean using Ubuntu, PM2, and Nginx reverse proxy.
- Integrated Firebase Authentication, Analytics, Crashlytics, and Push Notifications.
- Designed systems supporting India-wide service operations.

Key Projects Built**RepairPhone (Full-stack Service Platform)**

- Backend architecture developed from scratch.
- Multi-role operational workflows with Android apps for partners and operations.
- External API ecosystem for third-party integrations.

MacWinn.com (Integration Platform)

- Third-party integration platform based entirely on RepairPhone APIs.
- Built using React and Vite as a live production system for a Bengaluru repair center.

Cashmen.in**Senior Android & Full-Stack Developer**

- Developed Android applications for customers, dealers, regional managers, and administrators.
- Architected backend APIs using Node.js, Express.js, MongoDB, and Mongoose.
- Rebuilt frontend website using Next.js.
- Managed infrastructure deployment using DigitalOcean, Ubuntu, PM2, and Nginx.
- Implemented Firebase Authentication and Push Notification systems.
- Built scalable dealer and lead management workflows.
